## Professional Summary

Software Developer with strong foundations in Data Structures, Object-Oriented Programming, Backend Development, and Software Engineering principles. Experienced in developing scalable web applications, REST APIs, modern frontend interfaces, and machine learning solutions. Skilled in Python, Django, FastAPI, and full-stack development with a focus on performance optimization, debugging, and real-world project deployment.

## Education

**Institute of Management Research and Development, Shirpur**  
Master of Computer Applications (MCA)

June 2025  
CGPA: 8.79

**Arts Commerce Science College, Navapur**  
Bachelor of Science (B.Sc.)

May 2022  
CGPA: 9.66

## Technical Skills

**Programming Languages:** Python, TypeScript, C++ (Basic)

**Web Development:** Django, FastAPI, Flask, REST APIs, HTML, CSS, Angular

**Core Concepts:** Data Structures and Algorithms, OOP, SDLC, API Development, Database Design

**Tools & Platforms:** Git, GitHub, Linux, VS Code, Netlify, Vercel

**Libraries & Frameworks:** NumPy, Pandas, Scikit-learn, TensorFlow, OpenCV, MediaPipe

## Experience

**Software Engineer Intern — Zoblik International (Remote)**

Jan 2025 – Jul 2025

- Developed and optimized 10+ Python-based applications and machine learning solutions, improving model performance and reliability.
- Identified and resolved software bottlenecks through debugging and code optimization, reducing bug incidence by 40%.
- Automated data processing workflows, improving operational efficiency by 30% and reducing manual effort.
- Followed Software Development Life Cycle (SDLC) practices including testing, debugging, deployment, and maintenance.
- Collaborated using Git and GitHub for version control and team-based development workflows.

## Projects

**DraftMind Studio**

Nov 2025 – Feb 2026

Live Demo — GitHub

- Developed a responsive portfolio and creative agency website with modern frontend architecture and performance-focused design.
- Implemented interactive UI components, smooth animations, and optimized page transitions to improve user engagement.
- Designed reusable and scalable frontend components, improving maintainability and code organization.
- Applied SEO best practices including metadata optimization, sitemap generation, and search engine indexing improvements.
- Deployed and maintained production-ready application using Git, GitHub, and cloud hosting platforms.

**E-Commerce Platform (Django REST API, Angular)**

May 2025 – Jul 2025

Live Demo

- Designed and developed a scalable e-commerce application with authentication, product catalog, and shopping cart functionality.
- Built REST APIs and modular backend architecture using Django REST Framework.

- Integrated Razorpay payment gateway and optimized transaction workflows.
- Developed an admin dashboard for order management, analytics, and operational monitoring.
- Improved application maintainability through reusable components and structured API design.

### **Fall Detection System (OpenCV, MediaPipe)**

Feb 2025 – May 2025

- Developed a real-time computer vision system for fall detection using OpenCV and MediaPipe.
- Achieved 92% detection accuracy across extensive testing scenarios.
- Optimized video processing pipelines to maintain real-time performance above 25 FPS.
- Integrated automated alert mechanisms to notify stakeholders during detected incidents.

### **Core Competencies**

---

- Problem Solving and Analytical Thinking
- Software Debugging and Performance Optimization
- Scalable Application Development
- API Design and Integration
- Team Collaboration and Communication
- Continuous Learning and Adaptability

### **Certifications**

---

- Artificial Intelligence Foundation – Machine Learning (LinkedIn Learning)
- Python Mastery for Beginners (Udemy)
